

SBA 5.1.2.3: Implementing RIPv2 using CIDR

Topology

Objectives:

1. Build the Topology
2. compute for address:
 - Group 1 - 158.11.224.0/22
 - Group 2 - 11.21.200.0/21
 - Group 3 - 191.22.248.0/22
3. apply the compute address to the topology
4. use RIPv2 to configure the protocol.
