

SBA Lab Activity 6.1.3.1: Implementing EIGRP Network with Floating Static Back up Route

Topology:

Objectives:

1. Develop physical topology - 15 pts.
2. Compute for addresses using 178.200.G#.0/22 creating 100 subnets - 15 pts.
apply only the first 10 subnets to what is needed.
3. Configure EIGRP on all Routers - 20 pts.
4. Create Back up route of address 10.10.10.0 network using Floating Static Route- 20 pts.
5. List down the following EIGRP Database - 15 pts
 - a. Neighbor Table
 - b. Topology Table
 - c. Routing Table
6. Verify Connectivity - 15 pts
