

## SF Lab Activity 8.0..1.1 - DHCP Service Implementation

Topology:

Objectives:

1. Develop the Topology
2. Compute for the correct addresses basing on the given topology
3. Each router is a DHCP Server for all its connected networks
4. Implement the assigned protocol for each of the network
5. Apply Redistribution so that networks of different protocol can communicate
6. Verify Connectivity

Rubrics/Scoring:

1. Topology - 10pts
2. Addressing Table - 10pts.
3. DHCP Implementation - 15pts.
4. Routing Protocol Implementation - 10pts
5. Redistribution Implementation - 10pts
6. Connectivity - 10pts
